Marchers Deplore Blue Route Plans

Rain threatened, but that did not discourage approximately 150 people from walking through Smedley Park last Sunday. Some pushed baby carriages, while others rode bicycles or walked their dogs on leashes. Undoubtedly, all admired the fall folliage. Their reason for coming to the park, however, was to follow the path of the Blue Route, officially called Interstate 476, the Mid-County Expressway, and to see for themselves the place where the approved 6-lane highway will be constructed.

Smedley Park is not the only area of greenery that will be affected by the Blue Route; part of the western edge of the Crum Creek bordering on the College will be lost to the high-

by Teresa Nicholas

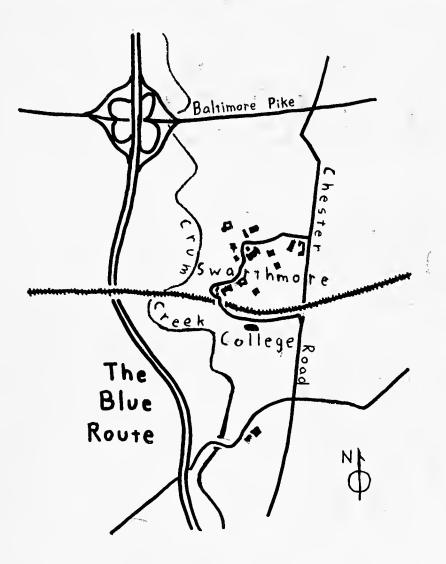

go underneath the railroad tracks, and again where it will go past the bridge just below Mary Lyon. To the south of Swarthmore it will cross over 320, and repeatedly cross over the Crum on its way to Chester and the junction with I-95."

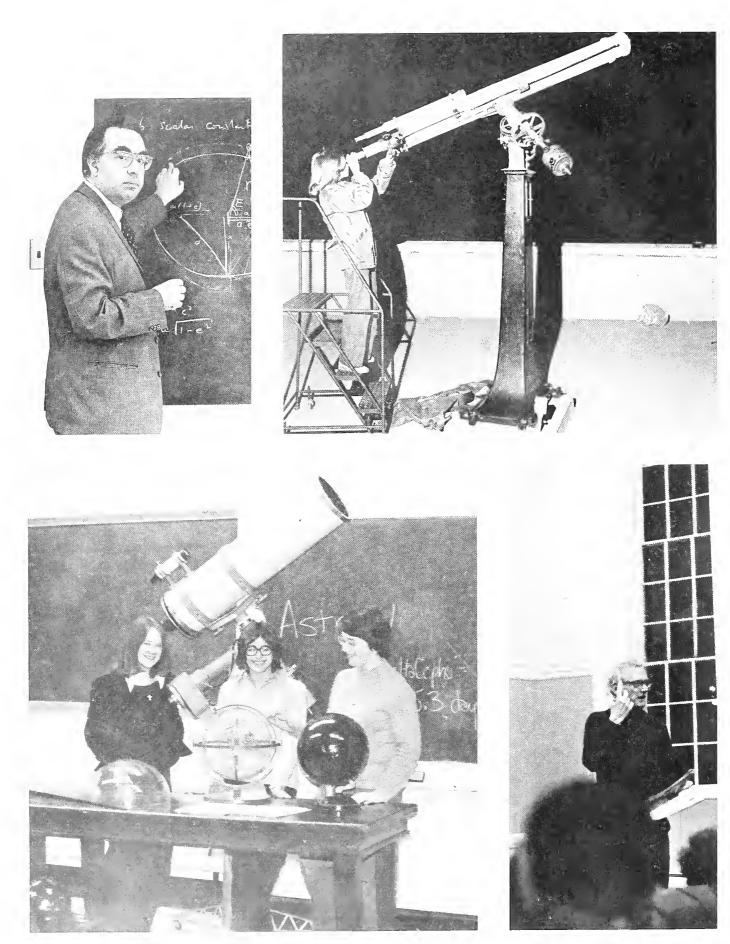

Yet the Blue Route is viewed by many as a great improvement over an earlier proposed route which would have run directly through the Crum basin. Indeed, the complicated history of Interstate 476 goes back to 1949 when highway planners first laid out possible routes, designated by different colors.

The Red Route was proposed in 1951 and ran through Springfield Township. With the Federal Aid Highway Act of 1956 making federal funding possible, and thus solving the problem of financing, more attention was paid to the highway's path.

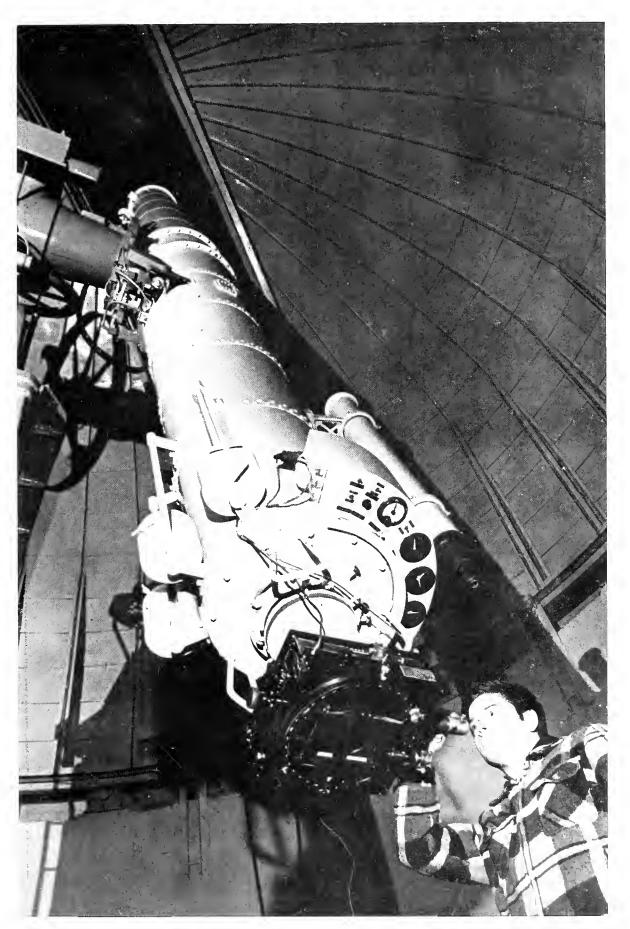

Citizens in Springfield became alarmed at the Red Route; the Blue Route which ran through Smedley Park and the College was proposed. Also proposed was the Green Route, running through Middletown Township. The State Highway Department discarded the latter route in 1957, and recommended the Red Route, which was not approved by the federal government.

Then, the U.S. Bureau of Public Roads scrapped the Red Route, now (Continued on Page 2)

Vol. 95 - Special Issue

Swarthmore College, Swarthmore, Pennsylvani

Friday, December 6, 1974

CEP Presents Report On Calendar Reform

As it has considered the numerous complex issues of calendar over the past weeks, the CEP has tried above all to keep its academic responsibility squarely in view. The Council has not disreparded issues of convenience-for example, when to hegin the academic vear or when to end the fall semester, nor has it overlooked the advantages (and their likely imits) of Swarth-more's approximating the calendar now in use at Bryn Mawr/ Haveford nor has it failed to explore, at least briefly, certain radical possibilities, like a calendar that ends the fall semester without a review or examination period, deferring exams for tort semesters until May, nor has it proceeded unmindful of the fset that exit nchanges in calendar commit the College to additional dollar costs But above all it has paid attention to those elements of calendar widely identified as academically important. important

important. Here are the most significant of the academic problems CEP has identified, along with brief comments as to the Council's deer

- Infiled, along with prier comments as to the council's length of semester: CEP determined on a semester in-cluding 14 weeks in classes and seminars as in kreping with Swarthmore's idea of excellence, the possibility of 13-y weeks of classes was also considered, but (inally thought to be logistically clumsy Symmetry of semesters: CEP decided on spring and fall semesters equal in class and seminar time The status of the Honors program. The decision was made not to adopt a calendar that might adversely affect Honors as presently constituted Freshman orientation: On the basis of evidence from decans and informed students, it was decided to provide 1
- 2.
- 3
- 4. deans and informed students, it was decided to provide
- for a 5 day orientation 5
- for a 5 day orientiation Sports schedules. Consultation with Bill Stetson and Pete Hess guided CEP in avoiding serious inconven ience to Swarthmore's sports schedules Interinstitutional cooperation CEP decided it would not propose a calendar that would dimuisis existent co-6

than a few (see the first of some of them preceding calendar 2 on 8 8) * See Appendix II In recent years, Swarthmore has moved its opening day closer than it used to be to Labor Day, in an effort to bring its academic year into such relationship with Brish Mawr Haverford's as to help facilitate student exchanges For the same reason, it has also abbreviated the period of classes and seminars that follows the 1'hri-timas holiday, and it has shortened the semester as well. All three of these changes have made for a calendar that is less than satisfactory in the opinion of most. Concuding, as has been suggested already, that it is well to maintain the present opportunities for interinstitutional cooper ation and that a semester that allows for 14 weeks of classes and seminars is academically sound, CEP acked whether it was necessary to accept constraints at both the beginning and at the end of the fall simester—that is, whether it was necessary to accept constraints at bas sometimes bried gritt with the calendar in use at Bryn Mawr Haverford, coupled with its resistance to absolute seduction, has sometimes, bring with the boliday becing the number of logistical problems, burnched in recent years to flirt with the calendar in use at Bryn Mawr Haverford, coupled with its evaluation to absolute seduction, has sometimes, brynned with the boliday becing the number of logistical problems, burnched in recent calendars between the start of the Christmas holiday and the beginning of seminars iand classe) in the spring semester, was to open the academic year carlier, and accordingly the calendar the dial semester which fallows methods belows includes 14 weeks of classes and seminars, as well as two 4 day weekends, and it ends—exams, papers, and all—being Christmas. Before the abovementioned decision was reached, arguments that led to the conclusions outlined in the foregoing paragraphs.

fore Christmas Before the abovementioned decision was reached, arguments that led to the conclusions outlined in the foregoing paragraphs were offered and considered. These arguments implied a suf ficient range of interest that when the Council requested of the Schedule of Classes Committee that it produce a calendar with simesters of equal length, including 14 weeks of classes and seminars, it also asked for a calendar including 13½ weeks of classes and seminars, with the 14th seminar located as con-veniently as possible. The reason for the request was to try for

Baccalaureate Day	Sun	23 May
Commencement Day	М	24 May

Baccalaureate Day Sun 23 May Commencement Day M 24 May For the sake of providing a basis for comparisons and con-trasts with the proposed calendar, CEP offers here a second new, which some may prefer. It represents an effort to use the existing calendar (1947) 50 as a model, with one important ex-ception—Calendar 2 ends classes and seminars (14 weeks of them) before Christmas, and it schedules a review period (5 days) and an examination period (8 days after the holiday. Den event) of this arrangement is that freshman orientation in 1975-76 need not begin unit! September 2, but thereafter until 1979-80, orientation would begin earlier by several days. In making the charge for Calendar 2 to the Schedule of Classes Committee, CEP enjoined the Committee not to make up a calendar that would reduce such cooperation as presently exists between Swarthmore and Birgy Maxr/Haverford/Pennsyl-vanta. CEP also asked the Committee to try to rectify the fol-lowing shortemings in the present calendar: 1 It does not incidue 14 weeks of classes and seminars 2 The post-Christmas period of classes is too biref to be taken seriously.

- taken seriously
- taken seriously It has no break until Thansgiving in the fall semester. It has too much overlap between classes and seminars 3 4
- in the spring semester The Christmas break is too long, considering the subse-quent time off between semesters 5

in the spring semister
The Christmas break is too long, considering the subsequent time off between semesters
The semesters are very far from symmetrical, though they are roughly equal in class time
Calendar 2 does indeed maintain something very like the present chances for interinstitutional cooperation, and it ameliorates the six "short comings" just histed
A further part of the charge for Calendar 2 invited the Schedule of Classes committee to consider an earlier opening date than the present cleances does maked seminars in the fall semester marking the date of the charge for Calendar 2 invited the Schedule of Classes and seminars in the fall semester marked with an asterisk—were incorporated into Calendar 2.
That both fall and spring semesters allow for 14 weeks of classes and seminars
That in the fall semester be preceded by a five day freshman are had on the same day.
That in the fall semester a minimum of two days of review be provided for between the and of classes and seminars
That the fall semester a minimum of two days of review be provided for between the and of classes and the start of the examination period
That the fall semester notice a long October weekend — a Statiday and Sunday to which are added the immediately following Monday and Tuesday
That there is a pring weation of one weeke
That Hor the gain gover written examinations (in the spring semester) begin and end at the same time.

- Inst there be a spring vection of one week That Honors and course written examinations (in the spring semester) begin and end at the same time, but no sonner than one week after end of classes and sem-nars (Honors students taking course examinations may require special scheduling by individual instructors for course avymanians).
- require special scheduling by individual instructors for course examinations) That oral Honors exams and Senior Comprehensive exams be planned in relation to each other as they are in the calendar for the spring semester, 1974.75 That commencement be held on the Monday following the Monday after Honors orals are ended 10

more College approved the calendar appearing above. The calendar's most salient feature is that exams occur before Christmas. A calendar along these guidelines will be used at Swarthmore for the next five years, according to the faculty resolution. The vote was 84 in favor, 18 opposed, and 5 abstaining.

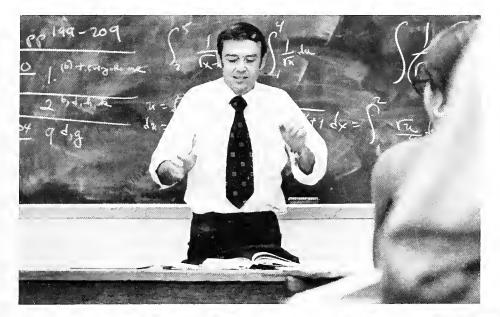

The calendar issue occupied the exclusive interest of Student Council, the CEP, and Student Activists for the entirety of the first semester this year. The issue itself was the proposed change from the present school calendar to one having Exams Before Christmas (EBX), which was supported by the vast majority of the student body. It was clear, however, that the accompanying issue of consideration of student opinion never disappeared from just beneath the surface. Reasons offered by both sides had been heard many times and were lacking in novelty.

The controversy had been a long and complicated one, involving many years of efforts to persuade the administration and faculty to heed student opinion. The outcome looked quite dismal early in January when the faculty nearly passed a "reactionary" ABC (A Better Calendar) proposal, which would have brought us back to the good old days of starting and ending the school year quite late. In desperation, student leaders called an all-student meeting in Sharples. Past S.C. President, Student Leader, and Orator par Excellence Jim Snipes presented a broad picture of the issue before 1971, and a more detailed history of the conflict between the students and the facultyadministration since the class of '75 arrived at Swarthmore, as he led up to the high point of the entire process. Neatly summing up his frustration at working within the system only to be put down yet again, Snipes momentarily betrayed his well-known moral standards when he proclaimed to some 800 students in the main dining room, "I've been screwed three times, and that's enough!!!"

The interest and enthusiasm which this statement generated in Snipes audience resulted in a last-ditch note-card campaign (the post office reported 5,000 sent to faculty and administration in 36 hours); the final faculty vote reflected an effort toward concensus with a tally of 84-18 in favor of EBX.
